
CORPORATE GOVERNANCE PRINCIPLES

The Bank's policy is based on the generally accepted four principles of corporate management, which are transparency, accountability, fairness and responsibility.

Transparency principle means that the information on the existing situation and incidents is accessible, and also concrete and understandable.

Accountability principle means proving the correctness of the decisions that are taken, and assuming the responsibility of these decisions.

Fairness principle means that the shareholders have equal rights and that they are subject to equal treatment.

Responsibility principle means a control method that encourages what is right and that punishes what is wrong, in order to ensure that the Bank's activities are carried out in compliance with the laws and the social values.
